Dear Friends,

This third annual scholarship report reflects the exceptional academic and professional accomplishments of the civil and environmental engineering faculty and PhD candidates for the 2015-2016 year. Our department has more than doubled in size of the faculty over the last five years, with 39 faculty in civil and environmental engineering, and has more than doubled in size of the graduate program over the last five years, with over 230 graduate students. The college looks forward to new infrastructure during this academic year, including adding a 220,000 square foot interdisciplinary science and engineering complex that will provide state-of-the-art laboratories.

This year the department launches two new graduate degrees, including an MS in Environmental Engineering (MSEE) and an MS in Engineering and Public Policy (MSEPP) with two concentrations, including Energy and Environment, and Infrastructure Resilience. These degrees focus on topics of significant national need, with the MSEE integrating environmental engineering and science with public health, water sustainability, and water-energy-nexus, and the MSEPP degree providing students with the core skills needed to address engineering solutions while recognizing the impact of public policy and societal constraints on these solutions.

The department continues to expand its research presence across all fields, and is currently leading the PROTECT Center, funded by the National Institute of Environmental Health Sciences (NIEHS) of the National Institutes of Health, and the CRECE Center, funded by NIEHS and the Environmental Protection Agency, to study the relationship between environmental contamination and preterm birth.

Our scholars strive to use today’s discovery and research to make tomorrow happen. You can see some highlights of our civil and environmental engineering faculty members at northeastern.edu/tomorrow. We hope you enjoy this report, and we look forward to sharing our future accomplishments in our annual scholarship reports.

Sincerely,
Jerome F. Hajjar, Ph.D., P.E.
CDM Smith Professor
Chair of Civil and Environmental Engineering
jf.hajjar@northeastern.edu
Professor Haris Koutsopoulos uses big data to advance the state of the art in transportation network analysis. The image shown was developed using informatics gathered from GPS observations to evaluate average speed and highlight congestion of transportation links in an urban network.
2 FEDERALLY FUNDED RESEARCH CENTERS

- PROTECT, The Puerto Rico Testsite for Exploring Contamination Threats, funded by NIH
- CRECE, The Center for Research on Early Childhood Exposure and Development, funded by EPA and NIEHS

2016 WINNER:
Andrew Myers for “Advancing Multi-hazard Assessment and Risk-based Design for Offshore Wind Energy Technology”

NATIONAL SCIENCE FOUNDATION CAREER Awards

32% female

39 TENURED/TENURE-TRACK Plus Affiliated Faculty

RECENT HIRES:
- Ameet Pinto PhD, Virginia Tech
- Amy Mueller PhD, MIT
- Qi Ryan Wang PhD, Virginia Tech

QUICK FACTS — Civil and Environmental Engineering

12 MULTI-INSTITUTIONAL RESEARCH CENTERS funded by six federal agencies

5 ENGINEERING DEPARTMENTS
- Bio
- Chemical
- Civil and Environmental
- Electrical and Computer
- Mechanical and Industrial

166 masters students

32% female

65 doctoral students

38% female

169 TENURED/TENURE-TRACK Faculty

NEW FALL UNDERGRADUATE students
2015 — 2016
665 + 729 = 1394

3550 UNDERGRADUATE students

NEW FALL MS students
2015 — 2016
939 + 1177 = 2116

3210 GRADUATE students

64 YOUNG INVESTIGATOR Awards

36 NSF CAREER Awards
HONORS

ACADEMICS

FACULTY HONORS AND AWARDS

CDM Smith Professor and Chair of civil and environmental engineering Jerome Hajjar along with electrical and computer engineering Professors Mario Sznaier, Octavía Camps, Ali Abur, and Edmund Yeh, mechanical and industrial engineering Professor Jackie Griffin, College of Science professor Lisa Feldman Barrett, College of Computer and Information Science professor Stacy Marsella, and Kostas director Peter Boynton were awarded a $2.5M NSF CRISP grant for the “Identification and Control of Uncertain, Highly Interdependent Processes Involving Humans with Applications to Resilient Emergency Health Response.”

Professor Akram Alshawabkeh, George A. Snell and his team were awarded a $2.9M grant for the Center for Research on Early Childhood Exposure and Development in Puerto Rico (CRECE).

Professor Haris Koutsopoulos was awarded the Traffic Simulation Lifetime Achievement Award by the Transportation Research Board. He has been a pioneer and a leader in the field of traffic simulation modeling for over 20 years.

CDM Smith Professor and Civil and Environmental Engineering Department Chair Jerome Hajjar is a co-recipient of the 2016 ASCE Moisseiff Award from the American Society of Civil Engineers for his paper on “Quasi-static Cyclic Behavior of Controlled Rocking Steel Frames.”

College of Engineering Distinguished Professor Ming Wang was awarded a patent for his design of a “Saliva Glucose Monitoring System.”

Associate Professor Edward Beighley received a $651K NASA grant for “Integrating Lateral Contributions and Longitudinal Controls Along River Reaches to Improve SWOT Discharge Estimates.”

College of Engineering Distinguished Professor Ming Wang, Professor and Associate Dean of Graduate Education Sara Wadia-Fascetti, and COE Distinguished Professor for electrical and computer engineering Carey Rappaport were awarded a patent for “Roaming Mobile Sensor Platform for Collecting Geo-referenced Data and Creating Thematic Maps.”

Assistant Professor Andrew Myers received a $500K NSF CAREER award for his project entitled “Advancing Multi-hazard Assessment and Risk-based Design for Offshore Wind Energy Technology.”

Associate Professor Ferdi Hellweger was featured in the Charles River Conservatory’s third volume of River Stories, which highlights local writers and artists. “My Computerized Charles River,” explores Hellweger’s experience and research in cleaning up the Charles River.

Assistant Professors David Fannon, Matthew Eckelman, and Architecture Assistant Professor Michelle Laboy’s project “Building Resilience: A Tool for Planning and Decision-making” was selected to be a part of the 2015 AIA Upjohn Research Initiative.

Professor Dionisio Bernal received a National Science Foundation grant for “Monitoring the Health of Structural Systems from the Geometry of Sensor Traces.”

Professor Mishac Yegian and George A. Snell Professor of Engineering Professor Akram Alshawabkeh were awarded a $342K NSF grant for “Field Application of Induced Partial Saturation (IPS) for Liquefaction Mitigation.”

Assistant Professor Matthew Eckelman is a part of a $10M, 5-year EPA center which is co-hosted by Yale and John Hopkins. The “SEARCH: Solutions to Energy, Air, Climate, and Health” Center is one of three in the country and includes Yale, Johns Hopkins, Stanford, Michigan, University of Chicago, Pacific Northwest National Laboratory, North Carolina State University, the Center for Disease Control, and Northeastern University.

Associate Professor Auroop Ganguly’s article, “Changes in Observed Climate Extremes in Global Urban Areas,” was Selected by Environmental Research Letters (ERL) as a feature in their Highlights of 2015 collection.

Associate Teaching Professor Daniel Dulaski helped present a transportation improvement plan to the town of Mansfield that received a $2.37M MassWorks grant. The project was conceived through the Civil and Environmental Engineering NU Transportation Capstone program.

Associate Professor Luca Caracoglia was awarded a National Science Foundation award for “Active Control of Nonlinear Flow-induced Instability of Wind Turbine Blades under Stochastic Perturbations.”

STUDENTS

PhD student Robert Phillips won first place in the student poster competition at the 2016 International Symposium on Sustainable Systems and Technology meeting.

PhD student Dongmei Feng, studying under Ed Beighley, was selected as a Student Research Fellow for the 2016 National Water Center Summer Institute.

Kelly O’Connell E’16, won the 2015-2016 Co-op Student of the Year award from the Cooperative and Experiential Education Division of ASEE.

PhD student Wenjun Zhang received this year’s Outstanding Graduate Student Award in the category of Research: Life Science, Physical Sciences, and Engineering.

Julietta Moradei E’16, won the Thornton Tomasetti Foundation National Scholarship, 2016 Sears B. Condit Award, and was awarded the 2016 Civil and Environmental Engineering Chair Award.

PhD, Cornell University, 1988
civ.neu.edu/people/hajjar-jerome

Scholarship focus: steel and composite steel/concrete structures; earthquake engineering; structural stability; large-scale experimental testing of structures; computational simulation

Honors and awards: Fellow, American Society of Civil Engineers; Fellow, Structural Engineering Institute; Norman Medal, American Society of Civil Engineers; Shortridge Hardesty Award, American Society of Civil Engineers; Moisseiff Award, American Society of Civil Engineers; T.R. Higgins Lectureship Award, American Institute of Steel Construction; Special Achievement Award, American Institute of Steel Construction; Walter L. Huber Civil Engineering Research Prize, American Society of Civil Engineers; Breakthrough Award, Popular Mechanics; Clemens Hershel Award, Boston Society of Civil Engineers

SELECTED PUBLICATIONS
M.D. Denavit, J.F. Hajjar, T. Perea, R.T. Leon
Seismic Performance Factors for Moment Frames with Steel-concrete Composite Columns and Steel Beams, Earthquake Engineering and Structural Dynamics, Special Issue on Earthquake-induced Collapse of Structural Systems, 45(10), 2016, 1685-1703
M.R. Denavit, J.F. Hajjar, T. Perea, R.T. Leon
Wind-wave Prediction Equations for Probabilistic Offshore Hurricane Hazard Analysis, Natural Hazards, 2016, 1-22
T. Perea, R.T. Leon, J.F. Hajjar, M.D. Denavit
Full-scale Tests of Slender Concrete-filled Steel Tubes: Interaction Behavior, Journal of Structural Engineering, 140(9), 2014
S. Szniszewski, B.H. Smith, J.F. Hajjar, B.W. Schafer, S.R. Arwade
The Mechanical Properties of a Sintered, Hollow Sphere, Steel Foam, Materials and Design, 54, 2014, 1083-1094
M.R. Eatherton, X. Ma, H. Krawinkler, G.G. Deierlein, J.F. Hajjar
Quasi-static Behavior of Controlled Rocking Steel Frames, Journal of Structural Engineering, ASCE, 140(11), 2014

SELECTED RESEARCH PROJECTS
Collaborative Research: Transforming Building Structural Resilience Through Innovation in Steel Diaphragms
Co-Principal Investigator, National Science Foundation
Deconstructable Systems for Sustainable Design of Steel and Composite Structures
Principal Investigator, National Science Foundation
Fast and Accurate Infrastructure Modeling and Inspection with Low-flying Robots
Principal Investigator, National Science Foundation

FERDI HELLWEGER
Associate Professor, Civil and Environmental Engineering; affiliated faculty, Bioengineering
ScD, Columbia University, 2004
civ.neu.edu/people/hellweger-ferdinand

Scholarship focus: surface water quality, microbial ecology and systems bioecology (the combination of systems biology and systems ecology)

Honors and awards: Environmental Merit Award, U.S. Environmental Protection Agency

SELECTED PUBLICATIONS
F.L. Hellweger
100 Years Since Streeter and Phelps: It is Time to Update the Biology in Our Water Quality Models, Environmental Science and Technology, 49(11), 2015, 6372-6373
F.L. Hellweger, N. Fredrick, J.A. Berges
Age-correlated Stress Resistance Improves Fitness of Yeast: Support from Agent-based Simulations, BMC Systems Biology, 8(18), 2014, 1-10
F.L. Hellweger, E. van Sebille, N.D. Fredrick
Biogeographic Patterns in Ocean Microbes Emerge in a Neutral Agent-based Model, Science, 345(6202), 2014, 1346-1349
Mighty Small: Observing and Modeling Individual Microbes Becomes Big Science, PNAS, 110(45), 2013, 18027-18028
N. Fredrick, J.A. Berges, B. Twining, D. Nuñez-Milland, F.L. Hellweger
Exploring Mechanisms of Intracellular pH Heterogeneity in Cultured Phytoplanктон Using Agent Based Modeling, Applied and Environmental Microbiology, 79(14), 2013
F.L. Hellweger

SELECTED RESEARCH PROJECTS
Dimensions: Collaborative Research: Anthropogenic Nutrient Input Drives Genetic, Functional and Taxonomic Biodiversity in Hypereutrophic Lake Taihu, China
Principal Investigator, National Science Foundation
Collaborative Research: Causes and Mechanisms of Cell Death in Freshwater Phytoplankton
Principal Investigator, National Oceanic and Atmospheric Administration
Consortium for Ocean Sensing In the Nearshore Environment (COSINE)
Principal Investigator, National Oceanic and Atmospheric Administration
FACULTY

BRIAN HELMUTH

Professor, Marine and Environmental Sciences; affiliated faculty, Civil and Environmental Engineering
PhD, University of Washington, 1997
civ.neu.edu/people/helmuth-brian

Scholarship focus: ecological forecasting and resilience of coastal environments

Honors and awards: Google Science Communications Fellow

SELECTED PUBLICATIONS

L.E. Petes, J.F. Howard, B. Helmuth, E.K. Fly
Science Integration into US Climate and Ocean Policy, *Nature Climate Change*, 4(8), 671-677
R. Griffis, J. Howard, E. Babij, B. Helmuth, A. Himes-Cornell, P. Niemier, M. Orbach, L. Petes et. al
M. Kearney, A. Matzelle, B. Helmuth
D.S. Wethey, L.D. Brin, B. Helmuth, K.A.S. Mislan

SELECTED RESEARCH PROJECTS

Predicting how Fine-scale Temperature Variation will Affect the Spatial Distribution and Temporal Stability of Species and Communities under Climate Change
Principal Investigator, National Science Foundation
Using an Energetics Framework to Forecast the Interactive Effects of Abiotic and Biotic Stressors on Intertidal Mussels
Principal Investigator, National Science Foundation

A. RANDALL HUGHES

Assistant Professor, Marine and Environmental Sciences; affiliated faculty, Civil and Environmental Engineering
PhD, University of California-Davis, 2006
civ.neu.edu/people/hughes-randall

Scholarship focus: marine community ecology and biodiversity

SELECTED PUBLICATIONS

T.C. Hanley, A.R. Hughes, B. Williams, H. Garland, D.L. Kimbro
A.R. Hughes, T.C. Hanley, N.P. Orozco, R.A. Zerebecki
Consumer Trait Variation Influences Tritrophic Interactions in Salt Marsh Communities, *Ecology and Evolution*, 5, 2015, 2659-2672
A.R. Hughes, D.A. Mann, D.L. Kimbro
A.R. Hughes, A.F.P. Moore, M.F. Piehler
Independent and Interactive Effects of Two Facilitators on Their Habitat-providing Host Plant, *Spartina alterniflora*, *Oikos* 123, 2014, 488-499
A.R. Hughes, K.E. Lotterhos
Genotypic Diversity at Multiple Spatial Scales in the Foundation Marsh Species, *Spartina alterniflora*, *Marine Ecology Progress Series*, 497, 2014, 105-117
P.I. Macreadie, A.R. Hughes, D.L. Kimbro
A.R. Hughes

SELECTED RESEARCH PROJECTS

Effects of Genetic Diversity, Epigenetic Change, and Root-associated Fungal Colonization on Trait Variation in the Foundation Plant *Spartina alterniflora*
Principal Investigator, National Science Foundation
Alabama Center for Ecological Resilience
Principal Investigator, Gulf of Mexico Research Initiative
Massachusetts Living Shorelines for Habitat Enhancement and Coastal Resilience
Principal Investigator, National Fish and Wildlife Federation
MICHAEL KANE
Assistant Professor, Civil and Environmental Engineering
PhD, University of Michigan 2014
civ.neu.edu/people/kane-michael

**Scholarship focus:** model predictive control; wireless control systems; automatic control of complex infrastructure systems

**SELECTED PUBLICATIONS**
M.W. Häckell, R. Rolfes, M.B. Kane, J.P. Lynch

M.B. Kane, J. Scruggs, J.P. Lynch

HARIS KOUTSOPoulos
Professor, Civil and Environmental Engineering
PhD, Massachusetts Institute of Technology, 1986
civ.neu.edu/people/koutsopoulos-haris

**Scholarship focus:** urban transportation networks and informatics, urban mobility, intelligent transportation systems, public transportation operations

**Honors and awards:** Traffic Simulation Lifetime Achievement Award, Transportation Research Board

**SELECTED PUBLICATIONS**
G. Goulet Langlois, H.N. Koutsopoulos, J. Zhao
Inferring Patterns in the Multi-week Activity Sequences of Public Transport Users, *Transportation Research C*, 64, 2016, 1-16

G. Sanchez-Martinez, H.N. Koutsopoulos, N.H.M. Wilson
Real-time Holding Control for High-frequency Transit with Dynamics, *Transportation Research B*, 83, 2016, 1–19

A. O’Sullivan, F. Pereira, J. Zhao, H.N. Koutsopoulos

A. Tympakianaki, H.N. Koutsopoulos, E. Jenelius

E. Jenelius, H.N. Koutsopoulos

E. Jenelius, H.N. Koutsopoulos
Probe Vehicle Data Sampled by Time or Space: Consistent Travel Time Allocation and Estimation, *Transportation Research Part B: Methodological*, 71, 2015, 120-137

**SELECTED RESEARCH PROJECTS**
Transport for London (TfL) Research Partnership
Principal Investigator, TfL

Mass Transit Railway (MTR) Research Partnership
Principal Investigator, MTR
PHILIP LARESE-CASANOVA

Associate Professor, Civil and Environmental Engineering
PhD, University of Iowa, 2006
civ.neu.edu/people/larese-casanova-philip

Scholarship focus: environmental chemistry and mineralogy; transformation and remediation of water pollutants; nanomaterial sorbents for water treatment

Honors and awards: National Science Foundation CAREER Award

SELECTED PUBLICATIONS
N. Cai, D. Peak, P. Larese-Casanova

A.E.P. Schellenger, A. Onnis-Hayden, D. Jaisi, P. Larese-Casanova
Oxygen Kinetic Isotope Effects in Selenate during Microbial Reduction, Applied Geochemistry, 63, 2015, 261-271

P. Paydary, P. Larese-Casanova
Separation and Quantification of Quantum Dots and Dissolved Metal Cations by Size Exclusion Chromatography-ICP-MS, International Journal of Environmental Analytical Chemistry, 95(15), 2015, 1450-1470

N. Cai, P. Larese-Casanova

A.E.P. Schellenger, P. Larese-Casanova
Oxygen Isotope Indicators of Selenate Reaction with Fe(II) and Fe(III) Hydroxides, Environmental Science and Technology, 47(12), 2013, 6254-6262

SELECTED RESEARCH PROJECTS
CAREER: Quantum Dot Degradation in Aquatic Environments
Principal Investigator, National Science Foundation

Insights to Selenium Cycling and Remediation Revealed by Stable Oxygen Isotopes
Principal Investigator, National Science Foundation

Recrystallization of Stable Iron Oxides in Reducing Environments
Principal Investigator, National Science Foundation

AMY MUELLER

Assistant Professor, Civil and Environmental Engineering; jointly appointed, Marine and Environmental Sciences
PhD, Massachusetts Institute of Technology, 2012
cive.neu.edu/people/mueller-amy

Scholarship focus: applications driven optimization, study, and remediation of the natural and built environments enabled by sensors and instrumentation development; signal processing and machine learning; closed-loop controls; sensor networks and communication

Honors and awards: National Science Foundation, Ocean Sciences Postdoctoral Research Fellowship

SELECTED PUBLICATIONS
A.V. Mueller, H.F. Hemond
Statistical Generation of Training Sets for Measuring NO3-, NH4+, and Major Ions in Natural Waters by an Ion Selective Electrode Array, Environmental Science: Processes and Impacts, 18(5), 2016, 590-599

A.V. Mueller, M.S. Orosz, A. Narasimhan, R. Kamal, H. Hemond, Y. Goswami

M.S. Orosz, A.V. Mueller

A.V. Mueller, H.F. Hemond
Extended Artificial Neural Networks: Incorporation of a Priori Chemical Knowledge Enables use of Ion Selective Electrodes for in-situ Measurement of Ions at Environmentally-relevant Levels, Talanta, 117, 2013, 112-118

A.V. Mueller, H.F. Hemond

SELECTED RESEARCH PROJECTS
Examining the Role of Anoxic Events on Coastal Micronutrient (Fe) Supplies from a Novel High-resolution Profiling Sampler
Principal Investigator, National Science Foundation

Remus-ISS: Enabling Adaptive in-flight Sampling for High Resolution Studies of Trace Metals
Co-Principal Investigator, Royalty Research Fund; University of Washington
SİNAN MÜFTÜ

Professor, Mechanical and Industrial Engineering; affiliated faculty, Bioengineering, Civil and Environmental Engineering

PhD, University of Rochester, 1994
mie.neu.edu/people/muftu-sinan

Scholarship focus: mechanics and tribology of axially moving materials, webs; numerical simulation of tissue healing and bone remodeling; high velocity impact of micron scale particles

Honors and awards: Fellow, American Society of Mechanical Engineers; Søren Buus Outstanding Research Award, College of Engineering; Martin W. Essigman Outstanding Teaching Award, College of Engineering

SELECTED PUBLICATIONS
Q. Sheng, A.J. White, S. Müftü
An Experimental Study of Friction and Durability of a Thin PTFE-film on Rough Aluminum Substrates, Tribology Transactions, 2016

Q. Sheng, A.J. White, S. Müftü

H. Yang, J.B.C. Engelen, A. Pantazi, W. Häberle, M.A. Lantz, S. Müftü

H.Y. Chou, D. Satpute, A. Müftü, S. Mukundan, S. Müftü
Influence of Mastication and Edentulism on Mandibular Bone Density, Computer Methods in Biomechanics and Biomedical Engineering, 18(3), 2015, 269-281

Yıldırım, H. Fukunuma, T. Ando, A. Gouldstone, S. Müftü

T. Kasikci, S. Müftü

SELECTED RESEARCH PROJECTS
A Novel Biomechanical Model of Bacterial Adhesion and Aggregation
Co-Principal Investigator, National Science Foundation

ARL Cold Spray Modeling Program
Technical Point of Contact, Army Research Laboratory

Collaborative Research: Mechano-lipidomics and Mechano-cytosis of Drug Delivery Liposomes
Co-Principal Investigator, National Science Foundation

Improving Theoretical Models of Advanced Tape Transport Systems
Principal Investigator, Oracle Corporation

ANDREW MYERS

Assistant Professor, Civil and Environmental Engineering

PhD, Stanford University, 2009
cive.neu.edu/people/myers-andrew

Scholarship focus: offshore wind structures; multi-scale experimental testing of structures; computational simulation; fracture and damage mechanics of metals; probabilistic modeling

Honors and awards: National Science Foundation CAREER Award; Civil and Environmental Engineering Excellence in Teaching Award

SELECTED PUBLICATIONS

S. Hallowell, A.T. Myers

V. Valamanesh, A.T. Myers, S.R. Arwade

SELECTED RESEARCH PROJECTS
CAREER: Advancing Multi-hazard Assessment and Risk-based Design for Offshore Wind Energy Technology
Principal Investigator, National Science Foundation

Enabling Advanced Wind Turbine Tower Manufacturing with Reliability-based Design
Principal Investigator, National Science Foundation

Reliability-based Hurricane Risk Assessment for Offshore Wind Farms
Principal Investigator, National Science Foundation

Risk and Decision-making for the Hurricane Threat to Offshore Wind Farms
Principal Investigator, Massachusetts Clean Energy Center

Optimization of Tapered Spiral Welding for Wind Turbine Towers
Co-Principal Investigator, National Science Foundation
ANNALISA ONNIS-HAYDEN

Associate Teaching Professor, Civil and Environmental Engineering
PhD, University of Cagliari, Italy, 2004
civ.neu.edu/people/onnis-hayden-annalisa

Scholarship focus: biological treatment processes; ecotoxicology and toxicity assessment; microbial population dynamics and ecology in engineered biological systems

Honors and awards: Civil and Environmental Engineering Excellence in Teaching Award; Martin W. Essigman Outstanding Teaching Award, College of Engineering

SELECTED PUBLICATIONS

Biotransformation of two Pharmaceuticals by the Ammonia-oxidizing Archaeon Nitrososphaera Gargensis, Environmental Science and Technology, 2016, 50(9), 4682-4692

S.M. Rahman, M.J. Eckelman, A. Onnis-Hayden, A. Gu
Life Cycle Assessment of Advanced Nutrient Removal Technologies for Wastewater Treatment, Environmental Science and Technology, 2016, 50, 3020-3030

A.E. Schellenger, A. Onnis-Hayden, D.P. Jaisi, P. Lares-Casanova
Oxygen Kinetic Isotope Effects in Selenate During Microbial Reduction, Applied Geochemistry, 63, 2015, 261-271

Universal Quantifier Derived from AFM Analysis Links Cellular Mechanical Properties and Cell-Surface Integration Forces with Microbial Deposition and Transport Behavior, Environmental Science and Technology, 48(3), 2014, 1769-1778

A. Onnis-Hayden, N. Majed, A.Z. Gu

Prokaryotic real-time Gene Expression Profiling for Toxicity Assessment, Environmental Science and Technology, 43(12), 2009, 4574-4581

SELECTED RESEARCH PROJECTS

Insights to Selenium Cycling and Remediation Revealed by Stable Oxygen Isotopes
Co-Principal Investigator, National Science Foundation

Investigate Mechanisms for Optimization and Design of Sidestream EBPR Processes as a Sustainable Approach for Achieving Stable and Efficient P Removal
Co-Principal Investigator, Water Environment Research Foundation

MARK PATTERSON

Professor, Marine and Environmental Sciences; jointly appointed, Civil and Environmental Engineering
PhD, Harvard University, 1985
civ.neu.edu/people/patterson-mark

Scholarship focus: development of autonomous underwater robots for civil infrastructure and marine sensing; decision support tools for gray/green infrastructure like tide gates; environmental fluid mechanics; biomechanics and mass transfer in living systems

Honors and awards: Member of the Year Award, Association of Unmanned Vehicle Systems International; Lockheed Martin Award for Excellence in Ocean Science and Engineering

SELECTED PUBLICATIONS

J. Elliott, M. Patterson, N. Summers, C. Miternique, E. Montocchio, E. Vitry
How does the Proliferation of the Coral-killing Sponge Terpios hoshinata Affect Benthic Community Structure on Coral Reefs?, Coral Reefs, 2016, 1-13

E.C. Edson, M.R. Patterson

J. Elliott, M. Patterson, E. Vitry, N. Summers, C. Miternique
Morphological Plasticity allows Coral to Actively Overgrow the Aggressive Sponge Terpios hoshinota (Mauritius, Southwestern Indian Ocean), Marine Biodiversity, 2015, 1-5

W.S. Howard, A. Gu, M.M. Garcia, M. Patterson, E. Izzo

S. Mukhopadhyay, C. Wang, M. Patterson, M. Malisoff, F. Zhang

SELECTED RESEARCH PROJECTS

MantaRay Microplastics Sampler
Co-Principal Investigator, Schmidt Marine Technology Partners, Schmidt Family Foundation

The Effects of Black Band Disease and Ocean Acidification on the Physiological Performance of a Scleractinian Coral
Co-Principal Investigator, Protect Our Reefs, State of Florida
AMEET PINTO

Assistant Professor, Civil and Environmental Engineering

PhD, Virginia Tech, 2009
civ.neu.edu/people/pinto-ameet

Scholarship focus: microbial ecology and physiology, drinking water treatment and distribution, wastewater treatment, public health microbiology, molecular microbiology, ‘omics analyses

Honors and awards: Bright IDEAS Award, Engineering and Physical Sciences Research Council

SELECTED PUBLICATIONS

Microbial Communities in Full-scale Drinking Water Distribution Systems – a Meta-analysis, Environmental Science: Water Research and Technology, 2016

Q.M. Bautista, O. Blakemore, J. Schroeder, J. Moses, M. Haffey, W. Sloan, A.J. Pinto
The Impact of Sampling, PCR, and Sequencing Replication on Discerning Changes in Drinking Water Bacterial Community over Diurnal Time-scales, Water Research, 90, 2016, 216-224

A.J. Pinto, D.N. Marcus, U.Z. Ijaz, Q.M. Bautista, G.J. Dick, L. Raskin
Metagenomic Evidence for the Presence of Comammox Nitrospira-like Bacteria in a Drinking Water System, mSphere Journal, 1, 2015

Spatial-temporal Survey and Occupancy-abundance Modeling to Predict Bacteria Community Dynamics in the Drinking Water Microbiome, mBio Journal, 5(3), 2014

A.J. Pinto, L. Raskin
PCR Biases Distort Bacterial and Archaeal Community Structure in Pyrosequencing Datasets, PLoS One, 7(8), 2012

A.J. Pinto, C. Xi, L. Raskin
Bacterial Community Structure in the Drinking Water Microbiome is Governed by Filtration Processes, Environmental Science and Technology, 46, 2012, 8851-8859

MATTHIAS RUTH

Professor and Director, School of Public Policy and Urban Affairs; jointly appointed, Civil and Environmental Engineering

PhD, University of Illinois, 1992
civ.neu.edu/people/ruth-matthias

Scholarship focus: dynamic modeling of social, economic and environmental systems, and their interactions; urban infrastructure systems analysis and modeling; urban climate impacts and adaptation; energy and resources economics and policy

SELECTED PUBLICATIONS

M. Ruth, O. Özgün, J. Wachsmuth, S. Gößling-Reisemann
Dynamics of Energy Transitions Under Changing Socioeconomic, Technological and Climate Conditions in Northwest Germany, Ecological Economics, 111, 2015, 29-47

S. Qiu, M. Ruth, S. Ghosh
Evacuated Tube Collectors: A Notable Driver Behind the Solar Water Heater Industry in China, Renewable and Sustainable Energy Reviews, 47, 2015, 580-588

M. Ruth, R.S. Franklin

J. Zhu, M. Ruth

J. Wachsmuth, A. Blohm, S. Gössling-Reisemann, T. Eickemeier, M. Ruth, R. Gasper, S. Stürmann
How Will Renewable Power Generation be Affected by Climate Change? The Case of a Metropolitan Region in Northwest Germany, Energy, 58, 2013, 192-201

J. Zhu, M. Ruth

Coastal Flooding, Climate Change, and Environmental Justice: Identifying Obstacles and Incentives for Adaptation in Two Metropolitan Boston Massachusetts Communities, Mitigation & Adaptation Strategies for Global Change, 17(5), 2012, 537-562

SELECTED RESEARCH PROJECTS

RSB: A Decision and Design Framework for Multi-hazard Resilient and Sustainable Buildings
Co-Principal Investigator, National Science Foundation

Incentives and Governance, Critical Infrastructures Resilience Center
Principal Investigator, Department of Homeland Security

The Effect of Energy-saving Regulations on the Location of Manufacturing
Principal Investigator, National Science Foundation
MEHRDAD SASANI
Associate Professor, Civil and Environmental Engineering
PhD, University of California at Berkeley, 2001
civ.neu.edu/people/sasani-mehrdad

Scholarship focus: progressive collapse of structures; earthquake engineering; structural resilience, integrity and reliability

Honors and awards: Fellow, American Society of Civil Engineers; Fellow, Structural Engineering Institute; National Science Foundation CAREER Award

SELECTED PUBLICATIONS
J.A. Murray, E. Hecht, M. Sasani

J.A. Murray, M. Sasani
Near-collapse Response of Existing RC Building under Severe Pulse Type Ground Motion using Hybrid Simulation, Earthquake Engineering and Structural Dynamics, 45(7), 2016, 1109-1127

L. Keyvani, M. Sasani

J.A. Murray, M. Sasani, X. Shao
Hybrid Simulation for System-level Structural Response, Engineering Structures, 103, 2015, 228-238

S. Sagiroglu, M. Sasani

J.A. Murray, M. Sasani
Seismic Shear-axial Failure of Reinforced Concrete Columns Versus System Level Structural Collapse, Journal of Engineering Failure Analysis, 32, 2013, 382-401

M. Sasani, S. Sagiroglu

M. Sasani, J. Kropelnicki

SELECTED RESEARCH PROJECTS
NEESR: Near Collapse Performance of Existing RC Concrete Frame Buildings
Principal Investigator, National Science Foundation

RSB: A Decision and Design Framework for Multi-hazard Resilient and Sustainable Buildings
Principal Investigator, National Science Foundation

THOMAS SHEAHAN
Professor, Civil and Environmental Engineering; Sr. Associate Dean for Academic Affairs
ScD, Massachusetts Institute of Technology, 1991
civ.neu.edu/people/sheahan-thomas

Scholarship focus: soft ground engineering, coastal adaptation, education and training for engineers and scientists

Honors and awards: Fellow, American Society of Civil Engineers

SELECTED PUBLICATIONS
S. Barbuto, T.C. Sheahan, J.P. Shine, A. Alshawabkeh, et al.
Benchscale Assessment of the Efficacy of a Reactive Core Mat to Isolate PAH-spiked Aquatic Sediments, Soil and Sediment Contamination: An International Journal, 23(1), 2014

D. Meric, A.N. Alshawabkeh, J.P. Shine, T.C. Sheahan

M.A. Kenney, E. Hamin, T.C. Sheahan
Reconceptualizing the Role of Infrastructure in Resilience, EOS meeting report, 95(33), 2014

D. Cheney, L. Rajicb, E. Sly, D.Meric, T.C. Sheahan
Uptake of PCBs Contained in Marine Sediments by the Green Macroalga Ulva Rigida, Marine Pollution Bulletin, 88(1-2), 2014, 207-214

K. Santora, E.J. Mason, T.C. Sheahan

SELECTED RESEARCH PROJECTS
Sustainable Adaptive Gradients in the Coastal Environment: Reconceptualizing the Role of Infrastructure in Resilience
Co-Principal Investigator, National Science Foundation

Puerto Rico Testsite for Exploring Contamination Threats (PROTECT), a National Institute of Environmental Health Sciences Superfund Research Center. PROTECT investigates the relationship between environmental contamination and preterm birth
Training Core Leader, National Institutes of Health
CRAIG SHILLABER
Assistant Teaching Professor, Civil and Environmental Engineering
PhD, Virginia Tech, 2016
civ.neu.edu/people/shillaber-craig

Scholarship focus: geotechnical subsurface characterization through in-situ and laboratory methods; quantification of construction energy and carbon; sustainable geotechnics

SELECTED PUBLICATIONS
C.M. Shillaber, J.K. Mitchell, J.E. Dove

C.M. Shillaber, J.K. Mitchell, J.E. Dove

C.M. Shillaber, J.K. Mitchell, J.E. Dove
Sustainability Considerations in Deep Mixing Applications, with Examples from LPV 111 in New Orleans, LA., Proceedings, Deep Mixing, Deep Foundations Institute, 2015, 511-520

C.M. Shillaber, J.K. Mitchell, J.E. Dove

J.E. Dove, C.M. Shillaber, T. Becker, A. Wallace, P. Dove

MICHAEL B. SILEVITCH
Robert D. Black Professor, COE Distinguished Professor, Electrical and Computer Engineering; affiliated faculty, Civil and Environmental Engineering
PhD, Northeastern University, 1971
ece.neu.edu/people/silevitch-michael

Scholarship focus: subsurface sensing and imaging systems, detection of explosives related anomalies, engineered system development and engineering leadership

Honors and awards: Life Fellow, Institute of Electrical and Electronics Engineers; 2015 National Academy of Engineering Gordon Prize, for developing an innovative method to provide graduate engineers with the necessary personal skills to become effective engineering leaders

SELECTED RESEARCH PROJECTS
ALERT: Awareness and Localization of Explosives Related Threats, A Department of Homeland Security Center of Excellence. ALERT seeks to conduct transformational research, technology and educational development for effective characterization, detection, mitigation and response to the explosives-related threats facing the country and the world

Director and Principal Investigator, Department of Homeland Security

CenSSIS: Center for Subsurface Sensing and Imaging Systems, Gordon-CenSSIS, a graduated NSF Engineering Research Center, was created to develop new technologies to detect hidden objects, and to use those technologies to meet real-world subsurface challenges in areas as diverse as noninvasive breast cancer detection and underground pollution assessment

Director and Principal Investigator, National Science Foundation

Research and Development of Reconstruction Advances in CT Based Object Detection Systems
Principal Investigator, Department of Homeland Security
ALI TOURAN
Professor, Civil and Environmental Engineering
PhD, Stanford University, 1980
civ.neu.edu/people/touran-ali

Scholarship focus: risk assessment; construction cost/schedule uncertainty; project delivery systems; simulation; construction productivity

Honors and awards: Fellow, American Society of Civil Engineers; President’s Award, Boston Society of Civil Engineers

SELECTED PUBLICATIONS
A.P. Gurgun, A. Touran
Public-private Partnership Experience in the International Arena: Case of Turkey, Journal of Management in Engineering, 30(6), 2014

A.P. Gurgun, Y. Zhang, A. Touran

P. Bakhshi, A. Touran

SELECTED RESEARCH PROJECTS
Integrated Project Delivery in Industrial Projects
Co-Principal Investigator, Construction Industry Institute

Managing a Portfolio of Projects – Metrics for Improvement
Principal Investigator, Construction Industry Institute

GEOFFREY C. TRUSSELL
Professor and Chair, Marine and Environmental Sciences; Director, Marine Science Center; affiliated faculty, Civil and Environmental Engineering
PhD, College of William & Mary, 1998
civ.neu.edu/people/trussell-geoffrey

Scholarship focus: evolutionary and community ecology; coastal sustainability

Honors and awards: Ray Lankester Investigatorship; Sigma Delta Tau Outstanding Professor

SELECTED PUBLICATIONS
C.M. Matassa, G.C. Trussell
Effects of Predation Risk Across a Latitudinal Temperature Gradient, Oecologia, 177, 2015, 775-784

S.M. Donelan, G.C. Trussell
Parental Effects Enhance Risk Tolerance and Performance in Offspring, Ecology, 96(8), 2015, 2049–2055

C.M. Matassa, G.C. Trussell

E.S. Bryson, G.C. Trussell, P.J. Ewanchuk
Broad-scale Geographic Variation in the Organization of Rocky Intertidal Communities in the Gulf of Maine, Ecological Monographs, 84, 2014, 579-597 (cover article)

L.P. Miller, C.M. Matassa, G.C. Trussell
Climate Change Enhances the Negative Effects of Predation Risk on an Intermediate Consumer, Global Change Biology, 20, 2014, 3834-3844

N.D. Chu, S.T. Kaluziak, G.C. Trussell, S.V. Vollmer

N.D. Chu, S.T. Kaluziak, G.C. Trussell, S.V. Vollmer

J.L. Orrock, E.L. Preisser, J.H. Grabowski, G.C. Trussell
The Cost of Safety: Refuges Increase the Impact of Predation Risk in Aquatic Systems, Ecology, 94(3), 2013, 573-579

SELECTED RESEARCH PROJECTS
Collaborative Research: Intertidal Community Assembly and Dynamics: Integrating Broad-scale Regional Variation in Environmental Forcing and Benthic-pelagic Coupling
Principal Investigator, National Science Foundation

Collaborative Research: Using an Energetics Framework to Forecast the Interactive Effects of Abiotic and Biotic Stressors on Intertidal Mussels
Co-Principal Investigator, National Science Foundation
SARA WADIA-FASCETTI

Professor, Civil and Environmental Engineering; Associate Dean, Graduate Studies
PhD, Stanford University, 1994
civ.neu.edu/people/wadia-fascetti-sara

Scholarship focus: condition assessment methodologies for infrastructure systems; life cycle and life span analysis; nondestructive testing and evaluation; structural and earthquake engineering uncertainty

Honors and awards: American Society of Engineering Education Sharon Keillor Award for Women in Engineering Education; Minorities in Engineering Award, American Society of Engineering Education; National Science Foundation CAREER Award; Presidential Award for Excellence in Science, Mathematics, and Engineering Mentoring, selected by President Bush and awarded at the White House

SELECTED PUBLICATIONS

A. Ganguli, C.M. Rappaport, D. Abramo, S. Wadia-Fascetti
Synthetic Aperture Imaging for Flaw Detection in a Concrete Medium, NDT & E International, 45(1), 2012, 79-90

K. Belli, S. Wadia-Fascetti, C. Rappaport

K. Belli, C. Rappaport, S. Wadia-Fascetti

SELECTED RESEARCH PROJECTS

Northeastern ADVANCE
Principal Investigator, National Science Foundation

IGERT: Intelligent Diagnostics for Aging Civil Infrastructure
Principal Investigator, National Science Foundation

VOTERS: Versatile Onboard Traffic Embedded Roaming Sensors
Co-Principal Investigator/Deputy Director, National Institute of Standards and Technology

KAI-TAK WAN

Professor, Mechanical and Industrial Engineering; affiliated faculty appointment in: Bioengineering, Civil and Environmental Engineering
PhD, University of Maryland at College Park, 1993
mie.neu.edu/people/wan-kai-tak

Scholarship focus: cellular biomechanics; water filtration; thin film adhesion and characterization; subsurface mechano-sensing; shell adhesion; fundamental intersurface forces

Honors and awards: National Science Foundation CAREER Award; College of Engineering Faculty Fellow

SELECTED PUBLICATIONS

M. Robitaille, N. Belisle, S. Dang, E. Faigle, C. Morck, P. Uth, K.-T. Wan
An Optical Topographic Technique to Map the 3-D Deformed Profile of a Convex Lens under External Loading, Experimental Mechanics, 55, 2015, 641-646

PERFORMANCE OF IRON ELECTROLYSIS FOR TRANSFORMATION OF TRICHLOROETHYLENE IN GROUNDWATER

In this study, iron electrolysis is assessed as a potential technology for the remediation of TCE contaminated groundwater. Groundwater contamination with chlorinated solvents, such as trichloroethylene or TCE, is a major environmental challenge. The development of innovative, efficient, and sustainable remediation technologies is needed. A three-stage experimental program is conducted in this study: (i) the evaluation of chemical changes in the electrolyte due to iron electrolysis in batch reactors, as well as the investigation of TCE degradation rates; (ii) the optimization of electrochemical operating variables using a multivariable statistical approach; and (iii) the assessment of a proposed electrochemical system under flow conditions for the remediation of groundwater contaminated with TCE.

ELECTRIC CONDUCTIVITY FOR LABORATORY AND FIELD MONITORING OF INDUCED PARTIAL SATURATION (IPS) IN SANDS

This dissertation focuses on this aspect of the IPS research. The monitoring system developed was based on using electric conductivity fundamentals and probes to detect the transport of chemical solution, calculate degree of saturation of sand, and determine the final zone of partial saturation created by IPS. To understand the fundamentals of electric conductivity, laboratory bench-top tests were conducted using electric conductivity probes and small specimens of Ottawa sand. Bench-top tests were used to study rate of generation of gas bubbles due to reaction of sodium percarbonate solution in sand, and to confirm a theory based on which degree of saturation were calculated.

The various laboratory and field tests confirmed that electric conductivity and the probes devised and used can be invaluable in the implementation of IPS, by providing information regarding transport of the chemical solution, the spacing of injection tubes, duration of injection, and the zone and degree of partial saturation caused by IPS.

**CLIMATE EXTREMES: PREDICTABILITY, IMPACTS, AND CONSEQUENCES AT REGIONAL SCALES**

Our study starts with the evaluation of the performance of latest generation of global climate models, Coupled Model Intercomparison Project Phase 5 (CMIP5) in simulating current climatology and multi-model agreement in projected climate change. Subsequently I studied the performance of CMIP5 models in simulating and projecting wind extremes at regional scales. Both of these studies were focused on long-term climatology, the end of the century time horizon. Multi-sector stakeholders are looking for reliable projections of climate change at near-term planning horizons as most of the decisions are made at time scales of one-to-two decades. Consideration of climate uncertainty especially climate internal variability and model response variability becomes more important as they dominate signal of climate change.

One of the important contribution of my research has been on enhancing the present understanding of the role of different sources of uncertainty with projection time horizons at multiple spatial scales for precipitation and temperature. Finally, the framework has been applied to study the how much thermoelectric power production will be at risk due to warmer and scarcer water under nonstationary climate change.

**MOLECULAR COOPERATIVITY AND COMPATIBILITY VIA FULL ATOMISTIC SIMULATION**

This research attempts to develop bottom-up molecular scale understanding of material behavior, with the global objective being the application of this understanding into material design/characterization at an ultimate functional scale. In particular, it addresses the subject of cooperativity at the nano-scale. This research aims to define the conditions which dictate when discrete molecules may behave as a single, functional unit, thereby facilitating homogenization and up-scaling approaches, setting bounds for assembly, and providing a transferable assessment tool across molecular systems.

A FRAMEWORK FOR PROJECT PORTFOLIO FORMATION USING A HYBRID OF MULTICRITERIA DECISION-MAKING METHODS

The main contribution of this dissertation is the development of a comprehensive framework for the formation of construction project portfolios. The most important phase of project portfolio management is portfolio formation. The survival of organizations depends on selecting the highest value projects considering a restricted budget, and above all organizational goals. A large and far-reaching online survey on portfolio management found that many organizations don’t have a systematic approach in portfolio formation under budget restriction. This finding served as the main impetus for developing a framework for portfolio formation in the field of construction capital projects.

The designed framework selects projects that are better aligned with organizational goals under a budget constraint. This framework creates balance in portfolios in terms of business lines and project types by allocating appropriate budgets among them following strategic objectives.

DEVELOPMENT AND EVALUATION OF INDUCED PARTIAL SATURATION (IPS), DELIVERY METHOD AND ITS IMPLEMENTATION IN LARGE LABORATORY SPECIMENS AND IN THE FIELD

The research presented in this dissertation was focused on: 1) development of an automated chemical solution preparation and delivery system, which will induce partial degree of saturation in liquefaction susceptible sands, 2) implementation of the system in large scale laboratory and field tests, and 3) verification that partial saturation reduces liquefaction potential.

Liquefaction of saturated loose sands during an earthquake is associated with the build-up of excess pore water pressure, leading to loss of shearing strength of the sand. Current liquefaction mitigation techniques used in practice are expensive, and cannot be implemented on sites with existing structures.

PROBABILISTIC HAZARD ANALYSIS OF EXTREME ENVIRONMENTAL CONDITIONS FOR OFFSHORE WIND TURBINES

The dissertation herein addresses two overarching themes. The first theme is structural modeling of offshore wind turbines (OWTs). While performance-based structural modeling of infrastructure subjected to natural hazards is a well-established field, modeling of OWTs presents some interesting challenges since an OWT can be considered as both a machine and a structure. In particular, the structural characteristics of an OWT vary significantly depending on the operational condition of the turbine. One of these characteristics, aerodynamic damping, is examined in detail in this work, and a closed-form equation for estimating the magnitude of aerodynamic damping for use in structural analysis software is proposed. The second theme is probabilistic characterization of hurricane-induced offshore hazard relevant to design and risk evaluations of OWTs.
